Renée Boudreau and Marie-Maude Grenier launched Melons and Clementines, a unique concept in Quebec, in April 2010. This fruit salad is the culmination of four years volunteering with Nourri-Source NDG, a breastfeeding mother-to-mother support group. With this experience

they were able to witness the difficulties families have in finding all the support and products which contribute to successful breastfeeding...all this under one roof. Whether looking for articles to ease their breastfeeding experience, for encouragement or just to vent, [Marie-Maud e Grenier](#)

and

[Renée Boudreau](#)

work tirelessly to service families and their breastfeeding relationship. Their ultimate wish to normalize breastfeeding is to ensure the developmental continuum for a healthier society.
